

Camstar has acquired SigmaQuest, a rapidly growing SaaS (software as a service) Supply Chain Intelligence solution for product quality management. SigmaQuest serves the largest brands in the world in the High Tech/Electronics, Solar, Medical Devices, A&D and Telecom industries. The transaction included acquisition of SigmaQuest’s IP, technology and the retention of the significant talent their team brings to Camstar.

The acquisition is another step in Camstar’s overall strategy for delivering a comprehensive platform for advancing product quality that meets the demands of our customers. The acquisition is a very clean merger – near perfect alignment of solutions, industries, and vision. This is good news for our customers, our employees, and our partners.

ABOUT CAMSTAR

Camstar is the global leader in providing scalable, enterprise software solutions that help manufacturers deliver the highest quality products on time, the first time, every time. Camstar is the largest in its market, providing solutions for manufacturing execution, process planning, enterprise quality management and manufacturing intelligence.

Founded in Silicon Valley, California, in 1984, Camstar moved its headquarters to Charlotte, NC in 2004. Camstar has offices worldwide. The company acquired Technology Resources Group to in 2009 to augment its APAC service and support infrastructure and add additional expertise in the Semiconductor, Solar and Electronics industries in that region. Camstar continues to evolve its product offerings to meet global manufacturing challenges.
